Frontend Software Engineer with 7+ years of experience blending technical expertise with user-centered design to deliver scalable solutions. Proven track record of optimizing operational efficiency and driving engagement through intuitive UI/UX enhancements and design system architecture. Excelled at Microsoft level scale, midsize, and startup companies.

TECHNICAL

- **Programming Languages:** JavaScript, TypeScript, HTML5, CSS, Python, Go
- **Frameworks & Libraries:** React.js, Next.js, Redux, Storybook, jQuery, Node.js, Tailwind, Styled Components
- **AI/ML & Emerging Tech:** Claude, Claude Design ChatGPT, LLM Integration, Codex, LLM UI, Cursor
- **Testing & QA Tools:** Jest, React Testing Library, Cypress, Playwright
- **Cloud Platforms & DevOps:** Azure, Google Cloud Platform (GCP), Azure DevOps, Datadog, GitHub Actions, Docker
- **Build & Styling Tools:** Babel, Webpack, ESLint, Prettier, npm, yarn, Figma, LaunchDarkly

EXPERIENCE

SYNDIO | Remote

02/2024–Present

Software Developer 3

- Design, build, and optimize frontend applications in React (Typescript & JavaScript). Implement scalable architectures, reusable components, and performance tuning to deliver responsive, testable, and high-performing user interfaces.
- Collaborate across engineering teams to integrate APIs and streamline developer workflows.

Select Achievements

- Spearheaded the development and implementation of a comprehensive WCAG compliance framework to meet EU accessibility standards. Directly unblocking \$2,000,000 in contracts.
- Built 0 to 1 Syndio's #2 revenue line: Global Pay reports. Multi-region reporting UI used in 47 jurisdictions.
- Built 0 to 1 the frontend for Syndio's AI chatbot. Leveraging SSE to deliver a smooth experience and citation rendering to meet our compliance requirements. Cut CSM workload ~60% on routine customer questions.
- Led Syndio's flagship product's feature redesign. Resulting in a 40% drop in support tickets related to said feature.
- Reduced accessibility regressions 30% by adding Jest + Playwright + axe as a quality gate. Blocking violations at a PR level instead of an accessibility audit.
- Reduced customer friction by embedding Syndio's AI chatbox directly into customers' Slack via a custom-built slack app.

TREASUREDAO | Remote

10/2023–02/2024

Frontend Consultant

- Engaged directly with a fast-moving Web3 startup as an independent consultant. Scoping requirements, delivering a pixel-perfect mobile-responsive site, and shipping production-ready solutions autonomously with minimal oversight.
- Tripled accessibility coverage through semantic HTML, ARIA labels, and keyboard navigation improvements. Translating compliance requirements into tangible implementation without a dedicated QA team.

MICROSOFT | Redmond, WA

08/2019–07/2023

Software Engineer

- Developed, maintained, and optimized frontend applications and reusable components across multiple platforms (web, app, mobile), ensuring high performance, accessibility, and scalability.
- Collaborated with cross-functional teams to troubleshoot issues, resolve on-call tickets, and implement CI/CD workflows to streamline development and release processes.

Select Achievements

- Drove targeted resizing initiatives and operational savings by leveraging data-driven visualizations to identify \$50M in over-provisioned VM costs.
- Designed and implemented accessible and WCAG-compliant UI components that surfaced to 100k+ users.
- Increased operational efficiency 66% by consolidating three disparate frontend codebases (web, app, mobile) into unified cross-surface codebase.
- Resolved 100+ on-call tickets across multiple projects through debugging, collaboration, and proactive issue resolution.

CORE COMPETENCIES

Frontend Development • UI/UX Design • Cross-Functional Collaboration • Generative AI Integration • CI/CD Pipelines
Workflow Automation • Testing Automation • Scalable Systems • Process Optimization • Adaptability • Quality Assurance •
Design Systems • Interactive Prototyping

EDUCATION

CALIFORNIA POLYTECHNIC STATE UNIVERSITY | San Luis Obispo, CA2019
Bachelor of Science in Computer Science

LANGUAGES

- English and Spanish fluency
